Lancaster County Adolescents Behaviors and Trends

YRBS 2005

In spring 2005, the Youth Risk Behavior Survey was completed by 739 students in six Lincoln Public high schools. The results in the 'Total' column are grade adjusted and are representative of all Lancaster county students in grades 9-12.

Students completed a 96 item questionnaire. The survey was administered to protect the privacy of the students by allowing for anonymous and voluntary participation. Parental permission was required before survey administration.

For a complete report on the survey, please visit www.lincoln.ne.gov and enter "health data" in key word, call 402-441-6270, or email: epi@lincoln.ne.gov
